

Introducing **eCROSS LINER**, a new era in energy-efficient slope mowers.

Thanks to the **record battery life**, which ranges from **5-8 hours on a single charge**, this model pushes the boundaries of efficiency. Its **patented drive system** allows unrestricted movement in all directions, maximizing the productivity of each movement.

And that's not all, the eCROSS LINER boasts **high slope accessibility**, enabled by an integrated safety winch. Moreover, these innovations are housed in a lightweight but durable aluminum alloy body.

WHY CHOOSE **eCROSS LINER**?

ENERGY EFFICIENCY

Thanks to the 4-wheel drive and steering, the mower completely **eliminates the need for skidding when turning**. This feature not only allows for efficient and unrestricted maneuvering in all directions but also, thanks to the zero-turn function, it can turn in place without damaging the lawn cover. This achieves **considerable energy efficiency** and preserves a beautiful and healthy lawn after each mowing.

UNIQUE DRIVE SYSTEM

The patented 'Dancing Step' drive system of SPIDER mowers guarantees excellent maneuverability in the terrain, maximum gentleness to the turf, high slope accessibility, and comfortable ride on various types of terrain.

EASY MAINTENANCE

The mower is equipped with only **2 main electric motors**, which greatly simplifies maintenance. Unlike models with combustion engines, there is no need to change filters, oils, or perform other demanding service activities. This not only reduces maintenance costs, but also saves time.

EASY TRANSPORT

SPIDER mowers are characterized by record low weight and compact dimensions, which allows for their easy transport in most standard vans, on standard trailers, or even in the luggage compartment of a car.

FULLY ELECTRIC DRIVE

With zero emissions production and quiet operation, the eCROSS LINER model is the optimal choice for lawn maintenance in sensitive areas. It is ideal for city parks, areas around children's playgrounds, residential complexes, or relaxation zones.

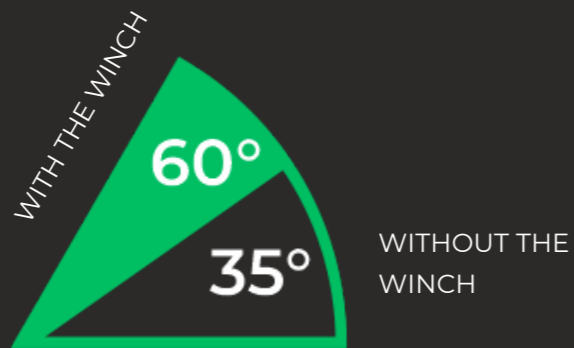

POWERFUL MULCHING SYSTEM

The eCROSS LINER is equipped with a specially modified mowing system, which does not require high power yet guarantees excellent mowing and mulching quality. The mower can easily handle mowing denser grass on flat grounds as well as on slopes.

EXTREME SLOPE ACCESSIBILITY

The eCROSS LINER is equipped with a patented stabilization winch, which allows it to operate on slopes with an incline of up to 60 degrees.

eCROSS LINER

CROSS LINER

Technical Specifications

MODEL	eCROSS LINER
POWER UNIT	
Drive Motors	A pair of synchronous motors with permanent magnet
Engine Power	1,500 W (drive propulsion) + 2,800 W (mowing system propulsion)
Battery Type	Lithium-ion (NMC)
Battery Voltage	50.4 V
Battery Life	5-8 hours (depending on terrain difficulty)
DRIVE SYSTEM	
Drive System	Patented SPIDER mode (4x4 drive and steering)
Zero-turn Rotation	YES
Speed	0-6 km/h
Wheels	13x5.00-6
MOWING SYSTEM	
Cutting Width	61 cm
Cutting Height	4-10 cm
PERFORMANCE AND DIMENSIONS	
Work Productivity	up to 2,500 m ² /h
Slope Accessibility	up to 60° (up to 35° without using a winch)
Noise Level	max. 89 dB
Dimensions (W x L)	98 x 111 cm
Height	60 cm
Weight	182 kg
