

INVISIO Intercom System

Bridging the gap between the mounted and dismounted soldier

The INVISIO Intercom system seamlessly integrates multiple communication devices and users. This small, lightweight and intelligent system is designed to be carried on-the-go or mounted directly onto any vehicle platform.

Connect and control your communications with a full range of INVISIO control units and hearing protection headsets for both mounted and dismounted operations.

Unique mobility

Mount Anywhere

Seamless Integration

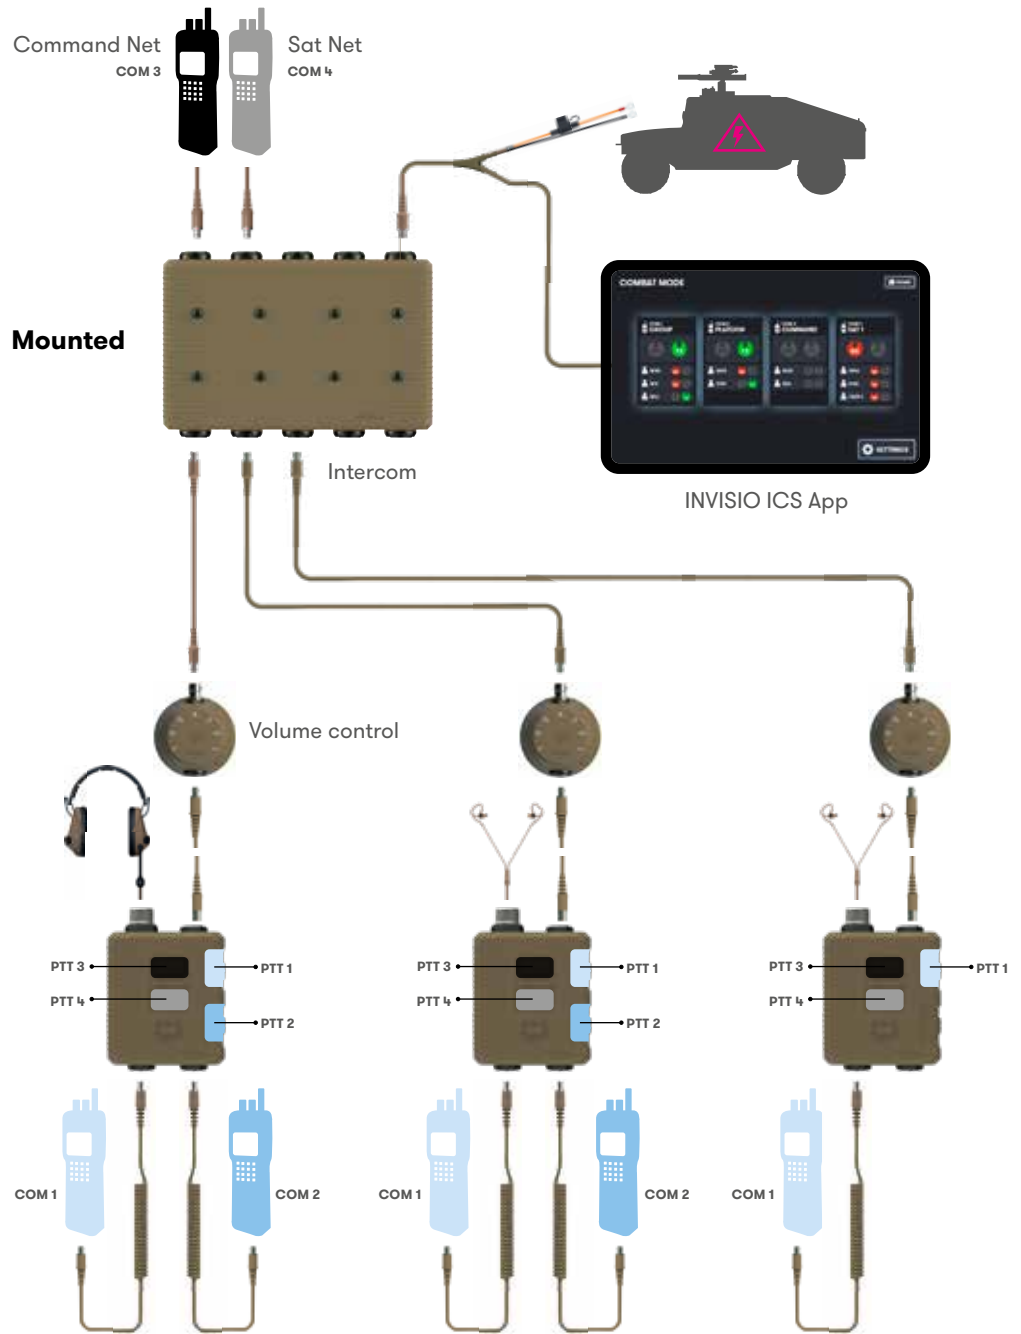

**Uninterrupted
Connectivity**

INVISIO Configuration Example

Typical configuration in a light tactical vehicle:

Personal radio functionality is maintained AND connected to the vehicle intercom.

With the INVISIO Intercom App you can adapt inter-team comms before or during the mission. It runs on a Windows 10/11 Tablet/PC or it can be integrated into a platform system via an API.

Dismounted
