

INVISIO X7

Redefining the usability of tactical in-ear headsets

INVISIO X7 redefines the usability of tactical in-ear headsets by perfecting ease-of-use, comfort, and performance.

The INVISIO X7 headset provides best-in-class SNR 39 dB / NRR 32 dB hearing protection, AI-powered clear communication, and 360-degree auditory situational awareness in extreme environments.

Designed for comfort and ease of use, it is powered and operated by an INVISIO Gen II control unit.

INVISIO X7 – Redefining the usability of in-ear headsets

Comfortable and easy to fit

- Ergonomically shaped for comfort and fit
- Small and lightweight – only 47 grams
- Integrated Voice Pick-up Sensor (VPU) does not require a specific in-ear contact point
- Comfortable in hot environments

Improved audio and situational awareness

- AI-powered algorithm filters out unwanted noise
- Robust and reliable Tx
- 360-degree level-dependent situational awareness
- Best natural, auditory situational awareness utilizing the contours of the ears

Flexible and rugged

- Helmet and gas mask agnostic
- Choice of multiple ear tip variants
- Submersible to 2 m for 2 hrs
- MIL-STD-810H compliant

Market leading hearing protection

- SNR 39 dB / NRR 32 dB (foam tips)
- Dual layer hearing protection option with SNR 43 dB with hear-through for extremely noisy environments
